

LANDSCAPE CONSERVATION

Our integrated conservation strategies, which build out ecological and economic viability in large landscapes, represent one of African Wildlife Foundation's leading contributions to the conservation field. The integrated approach speaks to one of the essential truths about AWF: While conservation of wildlife and their habitats is our mission, people are at the heart of our approach.

AWF works with governments, park managers, protected area authorities, wildlife-adjacent communities, local organizations, development NGOs, public-sector partners, and the private sector to facilitate investments, policies, and strategies that support wildlife as competitive land use, champion African-led conservation of the continent's natural resources, and put in place climate-change adaptation wherever possible.

We believe the best way forward is a deep, multilayered investment in conservation, specifically in activities that further three goals:

- Promotion of African conservation leadership,
- Conservation, protection, and restoration of Africa's ecosystems and the services they provide, and
- The protection of wildlife in their natural habitats.

Presently, we have prioritized work in 17 landscapes across ten countries, linking our objectives to partner countries' conservation strategies. Prioritization criteria include the richness of biodiversity, wildlife population viability, priority species' ranges, habitat connectivity, and feasibility factors such as political stability and an area's security.

Specific strategies are dependent on the opportunities and needs in each landscape but include participatory land-use planning, human-wildlife conflict mitigation, cross-border security and anti-poaching coordination, collaborative management of protected and conserved areas, court monitoring programs, trafficking deterrent programs, entrepreneurship training, the introduction of sustainable agriculture crops and practices, and establishing community conservancies and concessions.

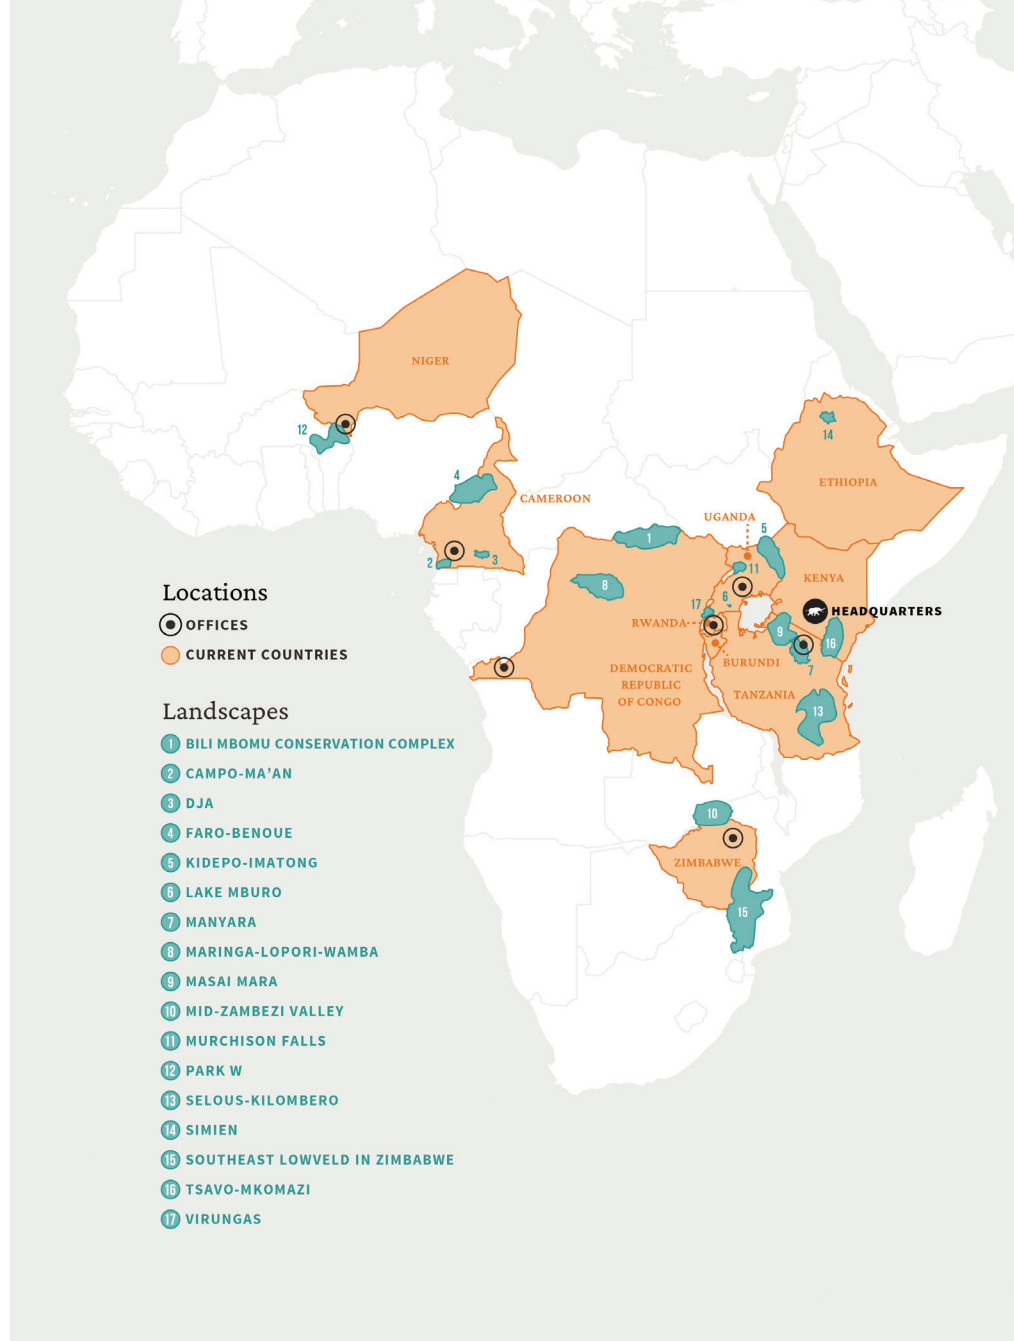

AWF PRIORITY LANDSCAPES

AWF currently works in 17 landscapes. To achieve lasting conservation impact, when engaged in a landscape, we are committed to working there over a minimum period of 10 years.

AWF PARTNERS IN LARGE LANDSCAPE CONSERVATION

We extend sincere gratitude to the following partners who support our programs in priority landscapes.

European Union
KFW - German Agency for International Cooperation
The Millennium Challenge Corporation (MCC)
U.S. Agency for International Development (USAID)
U.S. Bureau of International Narcotics and Law Enforcement Affairs (INL)
U.S. Department of State
U.S. Forest Service (USFS)
Ethiopian Wildlife & Conservation Authority (EWCA)
ICCN - Democratic Republic of Congo
Kenya Wildlife Service (KWS)
MINFOF - Cameroon
Rwanda Development Board (RDB)
Tanzania National Parks Authority (TANAPA)
Uganda Wildlife Authority (UWA)
Zambia Wildlife Authority (ZAWA)
Zimbabwe Parks & Wildlife Management Authority (Zimparks)
Anne Innis Dagg Foundation
Arcus Foundation
Blue Pacific Flavors
D.N. Batten Foundation
Foundation for Environment and Development (FEDEC)
Nancy-Carroll Draper Foundation
Nature's Path
Oak Foundation

AFRICAN WILDLIFE
FOUNDATION

*The African Wildlife Foundation's mission is to ensure
wildlife and wild lands thrive in modern Africa.*
